Continuation of 5. does NOT place the application in condition for allowance because: the arugments filed 29 December 2003 are not found to be persuasive since the applicant argues that the Hsu and Gill reference do not disclose the source region to be bias or programmed. That is correct and as stated in the office action dated 23 September 2003 the Steward reference discloses this limitation and shows the source side programmed and the drain side is grounded. In regards to the Hsu, Gill and Stewart reference not being able to be combined they are all memory device, which means they are from the same field of endeavor. Therefore the rejection stands.
